Multiple Job Openings—Cisco, Microsoft, Others

November 2008

Dear ASM Students, Alumni, and Visitors,

ASM is pleased to announce multiple Job Openings in partnership with a SDVOB (Service Disabled Veteran Owned Business) to support a project at the Department of Homeland Security. **Update as of 11-1-08:** Substantial **Salary range increase** for **Network Architect** and **Network Team Lead**. 401k Benefits was also added.

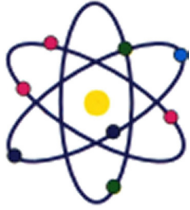

This letter contains 22 job openings.

General Information:

1. The Contract with multiple job openings is to support a project at the Department of Homeland Security.
2. Employment will be with a Service Disabled Veteran Owned Business (SDVOB) who is subcontracted to CSC (Computer Science Corporation).
3. SDVOB has already WON the contract.
4. These job postings are for FULL time employment; not a contractor.
5. Contract is for one year with option to extend for a total of 5 years.
6. There are additional job openings for this extensive Department of Homeland Security contract. Stay tuned for more job opening announcements.
7. Please forward this email to others (friends, family, business associates, etc.).
8. All applicants must be US Citizen.
9. All hires must have the ability to pass criteria for security clearance.
10. Extensive travel is required.
11. Employer Paid Health Benefits including Dental, paid 2 weeks vacation after 8 months of employment.
- 12. 401K Benefits after 6 months employment with SDVOB.**
13. All hires will go through an extensive background check upon hire and after the successful completion of this process will gain full time benefits with the SDVOB.

If Interested....:

1. Forward Resumes to info@asmed.com . ASM will subsequently forward all received resumes to SDVOB.
 - a. Clearly state the position you are requesting for consideration.
 - b. Provide salary or 1099 (rate) for the position you are seeking.
2. No (nick Names); clearly spell out legal name.
3. All contact information must be current with e-mail address.
4. All Interviews will be set up directly by the SDVOB. They will make the final decision.
ASM has no role during the interview process.

DETAILS on Multiple Job Openings Cisco, Microsoft, Others

Network Architect (In Bethesda) - 5 Openings

Compensation for each candidate under this classification is up to: \$105K to \$125K

Responsibilities and Duties:

Architect, Develop, Design and Integrate complex client network solutions with high-level One-Net Architecture and strategy.

Responsible for the Design of the network architecture, network infrastructure and plans and designs LAN/WAN wireless solutions.

Responsible for leading and directing an implementation team for deployment of moderately complex networks in extremely high visibility, mission critical sites for the client's program.

Create detailed network designs that meet the customer requirements (including physical and logical) of moderately complex network systems (and wireless) to meet the functional network of the business.

Responsible for product engineering design of client equipment (including survey report output and reviews).

Analyze client existing network and infrastructure to determine what equipment can be re-used and create bill of materials for those items that are determined to be EOL.

Create specification of the as-built network co-ordinate network turnover to the customer.

Experience:

5 years of government Experience is preferred.
5 years of Network Experience is required.

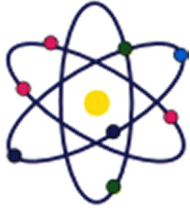

Education: Bachelors

CCNP certification is mandatory. If candidate is not certified, he or she MUST have equivalent hands-on Cisco experience.

Education:

CCNP certification or equivalent experience is mandatory.

Special/Unique Skills:

ASM Educational Center, Inc.

11200 Rockville Pike, Suite 220, Rockville, MD 20852 | Phone: (301) 984-7400 | Fax: (301) 984-7401
Web: www.asmed.com | E-mail: info@asmed.com

Candidate should expect to have extensive travel to any of the client's sites in the United States, Canada and Caribbean.

Network Team Lead

5 Openings

Compensation for each candidate under this classification is up to: \$105K to \$125K

Responsibilities and duties:

Lead a team in the installation /implementation of new redundant networks at client sites.

Configure on-site Cisco 45XX and 3750 switches to be installed. In a layer 3 environment, full redundant network.

Update and re-configure switches currently installed at sites to a new layer 3 environment incorporate in the new network designs.

Test newly installed network for operation and full redundancy. Perform fail-over testing of the WAN connection.

Install, configure and test Cisco 1522 WiFi equipment

Create as built document for the entire newly installed network.

Troubleshoot and perform problem resolution.

Experience 5-10 years

-Network Architect/design, network management and communication to client's technical team.

-**Microsoft Certified System Engineer (MCSE), Cisco Certification**, troubleshooting and diagnostic, network performance tuning, architect/design, NW Administration including installation, configuration and security, development of monitoring processes, capacity planning.

Education: Bachelors

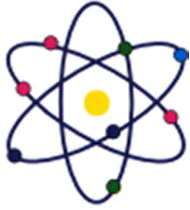

Cisco CCNP Certification or equivalent is mandatory.

CCNP certification validates a network professional's ability to install, configure and troubleshoot converged local and wide area networks with 100 to 500 network or more nodes. Network professionals with the CCNP certification have demonstrated the knowledge and skills required to install and manage the router and switches that form the network core as well as edge applications that integrates voice, wireless, and security into the network.

Cisco CCIE Certification is preferred.

Unique Skills/Requirement

Candidate should expect to travel extensively to any of the clients sites within the U.S., Canada, or the Caribbean.

Network Team Member

5 Openings

Compensation for each candidate under this classification is up to: \$71,500.00

Responsibilities and duties:

Assist the Team Lead with the Installation / implementation of new redundant network at client's site.

Configure on-site Cisco 45XX and 3750 switches to be installed in a layer 3 environment, full redundant network.

Update and reconfigure switches currently installed at sites to a new layer 3 environment incorporated in the new network designs

Test newly installed network for operation and full-redundancy. Perform fail-over testing of the WAN Connections.

Install, Configure and test Cisco 1522 WiFi equipment

Create as built documentation for the entire newly installed network

Troubleshoot and performed problem resolution of the newly installed network.

EXPERIENCE:

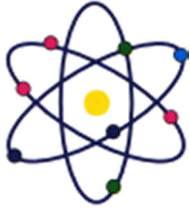

Cisco CCNA or equivalent is Mandatory.

The Cisco CCNA network associate certification validates the ability to install, configure, operate and troubleshoots medium size routed and switched networks, including implementation and verification of connections to remote site in a WAN. This includes basic mitigation of security threats, introduction to wireless networking concepts and terminology and performance based skills. This skill includes (but is not limited to) the use of these protocols: IP, Enhanced Interior Gateway Routing Protocol (EIGRP), Serial Line Interface Protocol Frame Relay, Routing Information Protocol Version 2 (RIPV2), VLANs, Ethernet, Access Control lists (ACLs)

Education: Bachelors
Cisco CCNA Certification

Unique Skills/Other Requirements

Candidate should expect to travel extensively to any of the client's sites within the United States, Canada or the Caribbean. Candidate should also be local to the Washington DC area, since travel to Bethesda may be required.
